Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 31 and 32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 31 recites the limitation "the opaque layer" in line 2. There is insufficient antecedent basis for this limitation in the claim. This rejection could be overcome by correcting "layer" to --area--.

Claim 31 recites the limitation "the semitransparent pattern" in line 3. There is insufficient antecedent basis for this limitation in the claim. This rejection could be overcome by correcting "pattern" to --area--.

Claim 32 recites the limitation "the transparent layer" in line 2. There is insufficient antecedent basis for this limitation in the claim. This rejection could be overcome by correcting "layer" to --area--.

Claim 32 recites the limitation "the semitransparent pattern" in line 3. There is insufficient antecedent basis for this limitation in the claim. This rejection could be overcome by correcting "pattern" to --area--.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 27-38 are rejected under 35 U.S.C. 102(e) as being anticipated by US 2004/0075798 (US '798). US '798 discloses a method of fabricating a liquid crystal display comprising the steps of providing a color filter substrate comprising a substrate, a black matrix, a color filter, and a common electrode; coating a positive or negative photosensitive material on the color filter substrate; exposing the photosensitive material to different values of light, either through two different masks or through a single mask having shaded, semi-shaded and unshaded portions; and developing the photosensitive material to form spacers and protrusions, wherein the spacers have a film thickness greater than the protrusions. See paragraphs [0157] to [0181], and Figures 18a-f.

3. Claims 39-46 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,583,846 (US '846). US '846 discloses a method of making an liquid crystal display comprising the steps of providing a light blocking film and a black matrix on a filter substrate; providing a color filter over the light blocking film and the black matrix; and

providing a spacer over the light blocking film in approximately the center of a pixel.

See column 14, lines 47-65 and Figures 17A-B.
